✉ todor.matthew.john@gmail.com

**ABOUT ME** I am a web developer trained in HTML, CSS, Javascript, with an emphasis on the MERN (MongoDb, Express.js, React, Node.js) stack. I am highly adaptable to new development tools and environments, with the ability to quickly familiarize myself with an existing code base. I am a proven team leader with the ability to establish communications to bridge customer requirements and technical development, with proven experience with continuous process improvement in multiple industries.

## EDUCATION

**University of Denver**
Flex Full Stack Web Development Boot Camp - Online
**Certificate - May 2022**

12-week full-time study of Web Development,, focused on the MERN stack, including Bootstrap and Redux.
Collaborated with peers and instructors to organize and implement and innovate code in an Agile style for three projects, including code review, source control via Git and deployment via Heroku.
A focus on both front end design and back end development inspired growth as a full stack developer

## EXPERTISE

Agile development

Github Version Control

HTML/CSS/Javascript

JQuery

GraphQL

MERN stack

MUI/Bootstrap

## PROJECTS

### Friender 🔗                     Github 🔗

React, Mongo DB, Nodejs, Express, GraphQL, Material UI

A social network application built using React and Material UI, leveraging GraphQL to connect to a MongoDB database hosted on the cloud. Ability to create a personal profile, select hobbies you enjoy, and find friends based on those hobbies.

### MatthewTodor.com 🔗                     Github 🔗

React, Nodejs, Material UI

A website built to showcase my talent, with current and previous projects, up-to-date work history and resume, and algorithms I've completed.

### Social Network API 🔗                     Github 🔗

Express, Nodejs, MongoDB, Mongoose

An API for a social network. Users can add friends and post thoughts, and other users are able to comment on those thoughts. Users and thoughts can be updated or deleted, and comments will be deleted with the thought when it is deleted.

## EXPERIENCE

### University of Denver

Full Stack Web Development Boot Camp
Teacher's Assistant

**July 2022 - Present**

- Assist in teaching students of various development skill levels web development concepts and languages, including HTML, CSS and Javascript. Build upon the foundational languages to teach both front end and back end development, all while fully remote.
- Collaborate with instructor on reviewing lesson plans for the day, going over goals and potential stumbling blocks, discussing solutions and simplified explanations for complex subjects.
- Analyze code from students to assist in finding the source of bugs, walking through the operation of the functions together to find the underlying problem.
